SQUELL

INVISIPERF METAL

SQUELL redefines the open-cell ceiling. Its modular square cells, crafted from our patented InvisiPerf Metal, achieve an exceptional NRC of 0.80 without any need for sound-absorbing backer or infill panels. This allows you to design dramatic, open-grid aesthetics that perform like a closed ceiling, all with a simple two-piece assembly system that simplifies installation.

- Large open area easily integrates lighting, HVAC, and sprinkler systems
- Modular two-piece system for design flexibility and efficient installation
- Available in multiple colors and premium finishes
- Class A Fire-rated for confident specification

SPECS

Material Composition: Aluminum with ultra micro perforations

Cell Shape: Square

Cell Size (On Center): 24" x 24", 48" x 48", Custom up to 72" x 72"

Height: 4" to 12"

Installation Method: Threaded Rod, Hanging Wire

NRC Rating: 0.80

Fire Rating: Class A Fire Rated per ASTM E84

SCALE

PERFORMANCE

The performance of InvisiPerf Metal is rooted in its patented, angled ultra micro-perforation technique. This departure from conventional 90° larger perforation methods optimizes the panel's surface to deliver exceptional sound absorption without needing acoustic infill. This breakthrough technology is the secret to achieving a visually seamless, monolithic aesthetic while meeting demanding acoustic requirements.
